Important notes 重要提示

- You should consider your own risk tolerance level and financial circumstances before making any investment choices. When, in your selection of funds, you are in doubt as to whether a certain fund is suitable for you (including whether it is consistent with your investment objectives), you should seek financial and / or professional advice and choose the fund(s) most suitable for you taking into account your circumstances. 您在作出投資選擇前，您必須衡量個人可承受風險的程度及您的財政狀況。在選擇基金時，如您就某一項基金是否適合您（包括是否符合您的投資目標）而有任何疑問，請徵詢財務及 / 或專業人士的意見，並因應您的個人狀況而選擇最適合您的基金。
- Your investment decision should not be based on this document alone. Please read the relevant principal brochure for further details, including the risk factors. 您不應只根據此文件的內容而作出投資選擇，如需詳細資料包括風險因素，請參閱相關之總說明書。
- Bank Consortium MPF Conservative Fund does not guarantee the repayment of capital. 銀聯信託強積金保守基金並不保證本金之全數付還。

A True Look at MPF Returns

多角度看積金10年回報

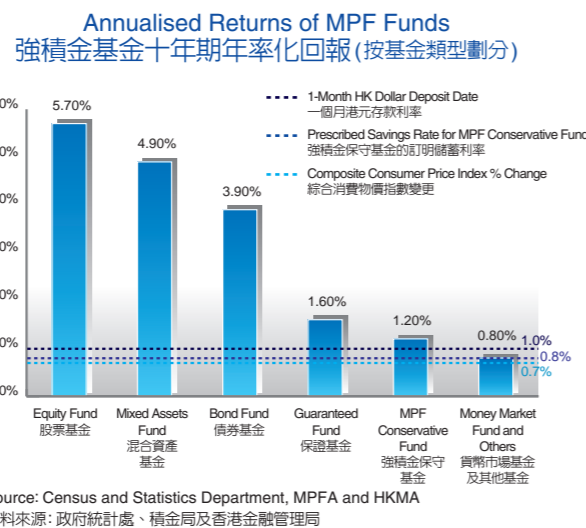

Having been in place for over a decade since inception in 2000, the MPF regime has received mixed reviews from different sectors of society, and so has its effectiveness. In this issue, we will take a look at how far the system has come and how much it has achieved in providing for retirement income protection for members.

1. Positive returns beating inflation

Since the advent of the MPF, financial markets have experienced periods of volatility resultant from the bursting of the dot-com bubble, the SARS outbreak and the global financial tsunami triggered by the U.S. sub-prime mortgage crisis. Nevertheless, data as of December 2010 from the Mandatory Provident Fund Schemes Authority (MPFA) revealed that over the decade, MPF funds recorded an annualised rate of return of 5.5% (after fees). The annualised returns (after fees) of different types of MPF funds for the 10-year period are shown on the right.

Over the past 10 years, the average annual growth rate of Hong Kong's Consumer Price Index was 0.7%. In other words, returns on the MPF exceeds inflation rate by almost 5%!

The data also shows that over the past 10 years, despite individual funds having recorded negative returns, MPF funds on average still managed to gain positive returns, evidencing the system's effectiveness in helping members accumulate retirement assets.

2. Long term growth with compounding effect

On average, each member has now accumulated MPF assets of about \$140,000, which might be considered an insignificant amount for some. However, the level of adequacy of retirement assets varies from people to people. In fact, retirement schemes such as the MPF are designed to achieve growth through making contributions over a longer investment horizon (say 30 to 40 years) where the benefits of compounding effect can be maximised. With the relatively short history of the MPF of only 10 years, it will take time for assets to grow to a significant amount.

You may use the "Calculator on MPF accrued benefits" on the MPFA website to find out the estimated total accrued benefits of your MPF investment in the year of your expected retirement. On the opposite

強積金自2000年成立至今已10年時間，這10年間大眾對強積金的制度及成效持不同意見。今期就讓我們根據一些實際數據，以多個客觀又嶄新的角度去重新審視強積金的成效及對強積金對成員在退休保障方面的貢獻。

一. 正回報 贏通脹

自強積金成立至今，金融市場已經歷多次衝擊，如科網股爆破，沙士疫症，由美國次按引發的全球金融海嘯等等。但參照積金局截至2010年12月的數據，整體而言，強積金制度在10年期內扣除費用及收費後，按年率化回報計算，平均每年回報(扣除費用後)為5.5%。而按基金種類計算，核准成份基金於同期的年率化回報(扣除費用後)見左圖。

香港消費物價指數過去10年，平均每年增長0.7%。所以強積金的投資表現跑贏通脹近5%！

換句話說，10年以來，即使有個別基金錄得負增長，強積金平均而言仍然錄得正回報。這亦證明強積金制度能夠為成員累積退休資產。

二. 複息效應 長線回報可觀

目前每位強積金成員平均累積到的退休資產約為14萬元，有些人可能認為金額仍未算多。不過退休資產是否足夠，每人皆有不同標準。事實上，強積金等退休保障計劃的設計是透過長期供款(約30年至40年)來讓投資回報隨著時間以複息增長。而強積金成立至今才10年，因此目前強積金款項還需要一段時間才可滾存至一個可觀的數目。

您可利用積金局網頁內的「積金計算機」，計算一下您現時的強積金投資，在自己預期退休的年份可增長至哪個水平。以下例子假設成員每月供款 \$1,000 至65歲，而

page is a chart illustrating the power of compounding effect, based on the assumption that a member contributes \$1,000 monthly until the age of 65 with an annual investment return of 5%:

As shown in the graph, while the compounding effect of a \$1,000 monthly contribution over 10 years might not look particularly marked, over a 40-year horizon, the assets will grow into a sizable amount. Therefore, members should not take lightly what can be achieved with the compounding effect of regular contributions over a long period of time.

It should be noted that when members are approaching the retirement age of 65, any drastic change in market conditions may seriously impact the value of their retirement assets and possibly prevent them from reaching their investment goals. If members who come under such circumstances have no pressing need to withdraw their MPF funds, they may consider retaining them in a preserved account, and only make withdrawals when the loss has been pared.

3. Your investment decisions make the difference

According to the MPFA, there are currently 422 MPF funds available for members. Given the significant difference in the performance of funds in different investment cycles, the choice of funds by each member makes a huge difference not only to his / her own retirement nest egg but also the investment returns of the overall MPF system.

When choosing MPF funds, you should first consider your own risk tolerance level and personal financial condition before examining various risks involved in relation to the expected long-term return on your investments. You can then make an informed and appropriate decision by taking into consideration all the relevant factors. It might be helpful to take note of a recent report from the MPFA, which shows that over the decade, equity funds witnessed a loss of 20.6% and a gain of 15.4% – both within a month (individual funds may experience higher volatility).

Equally notable is that over a longer investment horizon, the cumulative return of equity funds amounted to 75.4% over the 10-year period, while the return on MPF Conservative Funds over the same period was only 12.6%. It can be said that, therefore, the amount of MPF assets accumulated depends largely on members' investment decisions.

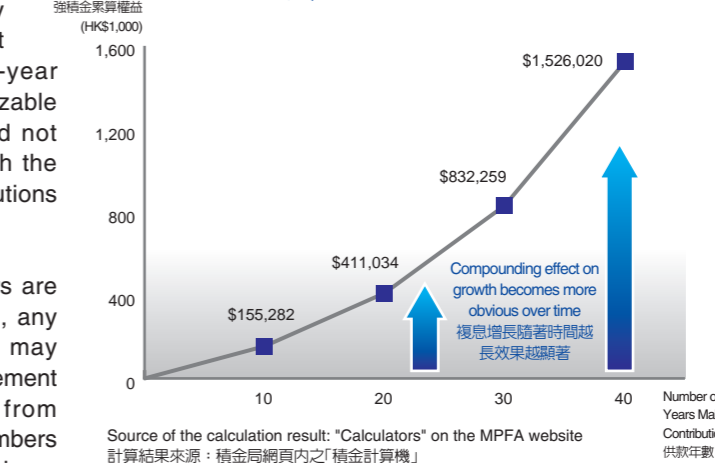

Conclusion 總結

Keys to achieving retirement goals

Unlike short term speculation, MPF is a long term investment requiring a different approach with a distinctive set of factors for consideration. Besides market risk and inflation risk, members should also bear in mind "longevity risk" – with increasing life expectancy, more retirement assets would be needed. But if you remember the three keys to MPF investment: regular contributions, long term investment, and the compounding effect, you should succeed in meeting your investment goals for retirement over time! ☺

每年投資回報為5%，從下圖可以清楚看到複息增長的效果：

MPF Accrued Benefits for a Monthly Contribution of \$1,000
強積金每月供款\$1,000的累積權益

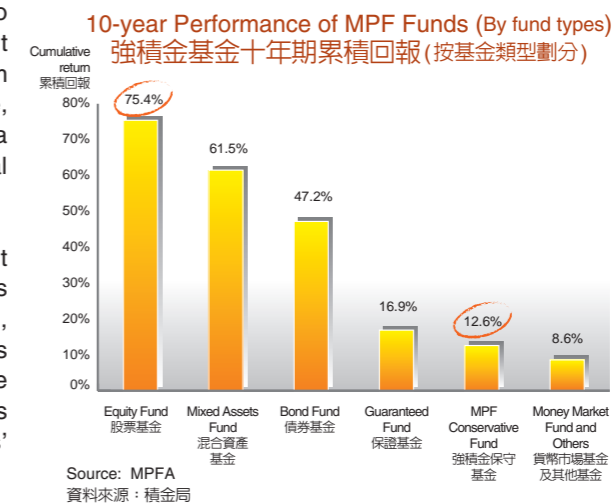

由此可見，每月供款 \$1,000，累積10年後，複息增長效果未必顯著；但累積40年後，卻可以是一筆可觀的款項。所以，不要小覷「定期供款、長期投資、複息增長」的威力！

然而，成員亦要注意，若接近65歲退休時，市況突然急轉直下，或會對成員的退休資產有重大影響，以致不能達致預期的投資目標。如遇到此情況，而成員並不急於提取強積金儲蓄，便可考慮繼續存放於帳戶內滾存，待資產價格回升後才提取款項。

三. 您的投資決定 左右資產增值

根據積金局的資料，目前共有422個強積金基金以供成員選擇。由於不同類型的基金在不同時期的回報水平差異極大，因此每位成員的強積金基金選擇，對其儲蓄成果，以至對香港整個強積金制度的投資回報均有重要影響。

您選擇強積金基金時，應先考慮到自己的風險承受能力及個人整體財務狀況，並理解風險與預期長期回報之間的關係，權衡輕重，以作出適當的投資決定。根據積金局的資料，整體股票基金在過去10年內曾出現過一個月達20.6%的虧損，亦曾出現過一個月達15.4%的增長(個別基金的波幅可能更大)。

但從較長線的投資角度來看，整體股票基金在過去10年內錄得75.4%的累積回報，而強積金保守基金同期的回報則只有12.6%。換言之，強積金累積的多寡，很大程度上取決於成員的投資決定。

緊守投資強積金的三大原則，目標可達

其實強積金屬長線投資，與短線投機性質不同，成員採取的投資策略及考慮因素亦有分別。除了市場風險及通脹風險外，退休投資特別要考慮「長壽風險」，即人均壽命愈來愈長，所需的退休資產亦相應增加。但如果您能緊記投資強積金的三大原則：「定期供款、長期投資、複息增長」，假以時日，您累積退休資產的目標便可安穩達到！☺

Market Commentary | 市場評論

Review and Outlook

On the back of improved U.S. economic data and corporate earning accompanied by further monetary tightening measures by some Asian economies, the U.S. stock market outperformed its Asian counterparts in the first quarter. Meanwhile, turmoil in the Middle East and North Africa spurred risk aversion, prompting capital to flow from emerging markets to developed markets. The tension in the Middle East also spurred crude oil price to climb above USD100 per barrel which further fueled the inflation pressure in emerging markets. Despite Japan's earthquake and nuclear leak which caused a round of market turbulence in mid-March, most major stock markets rebounded by the end of the month amid signs that the U.S. economy was strengthening and the nuclear crisis in Japan began to stabilise.

European stock markets were buoyed by the robust U.S. market, with Germany's DAX having increased by 1.8%, U.K.'s FTSE 100 Index by 0.1% and France's CAC by 4.8%. Credit ratings of Portugal and Spain were further cut by Moody's, prompting European leaders to broaden the size and scope of European Financial Stability Facility. However, a permanent solution to the region's fiscal crisis was still no where in sight with consensus yet to be reached among European nations. Going forward, peripheral European countries' debt woes would continue to cloud the economic outlook of the region. Meanwhile, the euro appreciated 5.8% against the U.S. dollar in the first quarter as the European Central Bank hinted at interest rate hike in next rate decision meeting.

美股造好帶動歐洲股市上升。德國DAX上升1.8%、英國富時100指數微升0.1%、法國CAC上揚4.8%。葡萄牙及西班牙再被穆迪調低信貸評級，促使歐洲多國領袖同意擴大「歐洲金融穩定基金」的金額及範圍。但歐洲多國仍未就區內財政危機的永久解決辦法達成共識。展望未來，歐洲的經濟前景仍會繼續受歐洲邊緣國家的債務危機困擾。與此同時，歐洲央行表示可能會於下次議息時調升利率，刺激歐元兌美元於第一季上升5.8%。

Due to a broadly positive assessment of economic conditions and strong corporate earnings, Dow Jones Industrial Average Index surged 6.4% over the quarter and hit a post-financial tsunami high of 12,391 during the quarter, despite a correction triggered by concern over the unrest in Libya and the nuclear leak in Japan in March. The Federal Reserve said the U.S. economic recovery was on a firmer footing and the labour market appeared to be improving gradually. The unemployment rate in the U.S. fell to a two-year low of 8.8% in March as employers created more jobs than previously forecasted. Looking ahead, the timing of withdrawing monetary stimulus after the completion of the second round of Quantitative Easing (QE2) in June would be the major focus of investors.

雖然3月份利比亞動亂及日本核洩漏危機，曾引發一輪市場調整，但經濟狀況普遍好轉，加上企業業績強勁，道瓊斯工業平均指數於季內上漲6.4%，並一度創出金融海嘯後新高12,391點。聯儲局表示美國經濟復甦基礎更為穩固，而勞工市場亦正逐步改善。3月份美國失業率跌至8.8%，為兩年以來最低，主要是由於僱主較預期提供更多新增職位。展望未來，第二輪量化寬鬆政策於6月結束後，美國何時實施退市措施，將會是投資者關注的主要課題。

市場回顧及展望

美國經濟數據及企業盈利改善，加上亞洲多國逐步收緊貨幣政策，美股於第一季跑贏亞洲股市。另外，中東及北非的緊張局勢觸發市場的避險情緒，促使資金由新興市場流向成熟市場。中東的緊張局勢亦刺激原油價格飆升至每桶100美元以上水平，進一步加劇新興市場的通脹壓力。三月中，日本地震及核洩漏事件觸發一輪市場波動；但至三月底，數據顯示美國經濟正在轉強，日本核危機亦逐漸受控，大部份主要股市均出現反彈。

Despite the 4.3% rebound of the mainland stock market in the first quarter, Hang Seng Index only inched up 2.1% during the period amid tensions in the Middle East and the nuclear crisis in Japan. Japan's disaster triggered a heavy sell-off during mid-March, but Hang Seng Index managed to pare the loss towards the end of the month with the robust U.S. stock market. People's Bank of China raised Required Reserve Ratio three times and interest rate once over the first quarter in order to stem inflation. Locally, Hong Kong's unemployment rate fell to 3.6% in February, the lowest since November 2008, indicating Hong Kong economy was in healthy condition.

雖然內地股市於季內反彈4.3%，但受中東緊張局勢及日本核危機影響，恒生指數於第一季僅微升2.1%。三月中，日本災難令港股一度急挫，但三月尾，美股上揚帶動恒生指數收復失地。中國人民銀行於第一季調高存款準備金率三次，並加息一次，以打擊通脹。本港方面，二月份失業率跌至3.6%，為2008年11月以來最低，反映本港經濟狀況良好。

Major Asian stock markets were lacklustre in the wake of the tension in the Middle East and nuclear leak in Japan: Taiwan and Singapore fell by 3.2% and 2.6% respectively, while South Korea rose by 2.7% in the first quarter. Asia was faced with the challenge of sustaining economic growth while reining in inflation. Surging oil and food prices stoke inflation which forced countries in the region (including India, Indonesia, Malaysia, South Korea, Singapore, Thailand, the Philippines and Vietnam) to tighten monetary policy. Going forward, the upside risk to inflation is likely to remain and the interest rate normalisation process would continue.

在中東緊張局勢及日本核洩漏事件的影響下，亞洲主要股市普遍受壓。其中台灣及新加坡於第一季分別下跌3.2%及2.6%，而南韓則上升2.7%。亞洲各國正面對既要保持經濟增長，又要控制通脹的兩難局面。油價及食物價格上漲，令通脹加劇，促使亞洲多國(包括印度、印尼、馬來西亞、南韓、新加坡、泰國、菲律賓及越南)收緊貨幣政策。展望未來，通脹上升風險仍然存在，而利率正常化的過程仍會持續。

Nikkei 225 Index plunged sharply in the aftermath of the 11 March earthquake, closing the quarter with a 4.6% drop. The yen rose at one point to a record high of 76 against the U.S. dollar in expectation of Japanese companies repatriating significant funds from overseas. Subsequently, the intervention by the Group of Seven to sell the yen had brought the yen back down to above the 80 level. Meanwhile, the earthquake also caused disruption in power supply, operations at factories and supply chain in Japan. The Japanese government was considering abandoning a proposed corporate tax cut and boosting sales tax rate to fund the reconstruction, but such steps might damage private consumption which was already depressed by the earthquake.

日經225指數於3月11日大地震後急挫，總結第一季共下跌4.6%。投資者憧憬日本企業將會由海外調回大量資金至本土，刺激日圓兌美元一度攀升至歷史新高76水平。其後，七大工業國聯手沽售日圓，令日圓匯價回調至80以上水平。與此同時，日本地震亦影響當地電力供應、工廠運作及供應鏈。日本政府考慮放棄削減企業稅的計劃，並計劃提高銷售稅，以應付災後重建的資金需要，但有關措施可能會進一步打擊本來已受地震影響的私人消費。

Hong Kong and Chinese equities ended the quarter higher, despite increased risk aversion among investors due to events in Japan and the ongoing political tensions in the Middle East and North Africa. Hang Seng index and Hang Seng China Enterprises Index were up 2.1% and 4.9% respectively. China Consumer Price Index increased 4.9% year on year (y-o-y) in February, while industrial production grew 14.1% y-o-y. The Chinese authorities announced their 12th five year plan targets, with an average annual GDP growth target of 7%.

雖然日本地震和中東及北非政治局勢持續緊張，投資者避險情緒升溫，但香港及中國股市於本季仍然收高。恆生指數及恆生國企指數分別上升2.1%和4.9%。2月份，中國消費物價指數按年上升4.9%，而工業生產則按年增長14.1%。中國當局宣布第12個5年計劃，國內生產總值的年均增長目標為7%。

Market Commentary 市場評論

While China continues its course to normalise economic growth and monetary conditions, external global events so far this year have added new challenges ahead. Asset prices and valuations have attempted to anticipate these impacts, resulting in accentuated volatility. With China continuing to proactively manage inflation with monetary normalisation / tightening being in their advance stages, inflationary pressure may well be less impactful than expected earlier which will help to anchor some level of certainty.

2011年以來，正當中國進行貨幣政策正常化及調整經濟增長模式，環球局勢不斷帶來新挑戰。這些外圍因素令資產價格及估值出現異常波動。隨著中國不斷加大利率正常化及收緊貨幣政策的力度，以調控通脹；通脹壓力或會較原先預期低，令未來市況轉趨明朗。

Market Commentary 市場評論

Market sentiment remained weak in March primarily influenced by the growing external uncertainties including the earthquake, tsunami, and nuclear accident in Japan, the ongoing political tensions in the Middle East, and further monetary tightening in China. Overall, Hang Seng Index gained 2.1% in 1Q with China Unicom and Petrochina being the best performing constituent stocks. Hong Kong developers rebounded on the back of the strong pickup on primary residential sales.

三月份, 受到日本地震、海嘯及核洩漏意外, 再加上中東政局持續緊張, 以及中國進一步收緊銀根等外圍因素影響, 市場氣氛明顯轉弱。總括而言, 恒生指數於第一季度上升 2.1%, 其中中國聯通及中石油為表現最佳的成份股。受惠於一手樓宇銷售成績理想, 香港地產發展類股份亦見反彈。

Market Commentary 市場評論

The Asian stock markets have gone through a roller coaster ride in 1Q and are again trading at fair value across many markets. Investors have largely brushed off all the negative news as their risk appetite increases. We see some short term risk of earnings expectations being scaled back as higher material and labour costs have started to hit bottom lines and the sell side is yet to pencil in. Expectations for markets are for continued volatility into 2Q with the start of an upward bias moving into 3Q. Any correction will create a buying opportunity for longer term investors given the relative stronger fundamentals of Asian economies.

亞洲股市於第一季出現劇烈波動, 許多市場的估值再度回落至合理水平。隨著投資者願意承受更高風險, 負面消息的不利影響被大部份投資者所忽略。由於原材料及勞工成本大幅上漲的影響開始顯現, 而賣方的盈利預期尚未反映這些影響, 因此, 我們認為短期內部份盈利預期將面臨下調的風險。展望第二季度, 市場將持續波動, 並將於第三季度初開始出現上升趨勢。鑒於亞洲各經濟體系的基本因素相對強勁, 市場發生任何調整均會為長線投資提供買入機會。

Market Commentary 市場評論

European equities moved higher over the quarter. Germany continues to be the beacon of strength within Europe, with solid growth in exports of goods and services. German unemployment fell for the twenty-first consecutive month, helping to reduce overall Eurozone unemployment rate too. The German unemployment rate fell to 7.1% while the Eurozone rate is now at 9.9%. The European Central Bank has kept rates at a record low of 1% for almost two years as the financial and debt crises have unfolded, but with initial estimates pointing to inflation of 2.6% up from 2.4% in February, markets are expecting a rise in April.

歐洲股市在季內造好。德國是歐洲各國經濟的指標，其商品和服務出口穩健增長。德國失業率連續21個月下跌，有助降低整體歐元區內的失業率。德國失業率下降至7.1%，而目前歐元區則為9.9%。隨著金融和債務危機不斷出現，歐洲央行近兩年來維持利率在歷史低水平的1%。初步估計通脹會由2月份的2.4%上升至2.6%，市場預期利率於4月份將會上調。

Market Commentary 市場評論

During the quarter, global equity markets had to contend with rising unrest in the Middle East, which drove oil prices sharply higher, monetary tightening across many emerging markets, and two catastrophic natural disasters, with a subsequent nuclear emergency, in Japan. The fact that equities ended the quarter modestly ahead indicates the resilience of the global economic recovery, demonstrated by upbeat data releases and a strong quarterly corporate results season.

季內，中東局勢漸趨動盪，導致石油價格急升，新興市場紛紛推出貨幣緊縮措施，再加上日本遭遇兩重大災並引發核危機，拖累環球股市。股市最終仍於季末錄得輕微升幅，因為公布的數據理想和企業季度業績強勁，反映全球經濟復蘇存有動力。

Market Commentary 市場評論

In February, markets were spurred by growing optimism about economic recovery. However, rising inflationary pressures and monetary tightening in China as well as Europe's fiscal health dominated investor sentiment. In March, the Japanese earthquake and tsunami led to a sharp correction in equities, although markets recovered towards the end of the period. Energy stocks outperformed other sectors as oil prices continued to rise. Meanwhile, defensive sectors, notably utilities, underperformed.

在二月份，市場一度受到經濟復甦的樂觀情緒刺激而上升。但投資者情緒仍然受中國通脹壓力高企及貨幣緊縮政策，以至歐洲的財政狀況所支配。三月份，環球股市受日本地震及海嘯影響出現顯著的調整，但臨近季末時市場已收復失地。油價持續上升令能源股份表現跑贏其他類別股份。與此同時，防守性股份表現跑輸大市，特別是公用事業股份。

Market Commentary 市場評論

Equity markets recovered from their mid-March lows following the devastating Tohoku earthquake, tsunami and radiation leakage at the Fukushima nuclear power plant, although not all ended the quarter in positive territory. However, robust corporate earnings and economic growth in the Asian markets (ex Japan) buoyed indices higher with Korea reporting its strongest full year 2010 GDP for eight years. The German unemployment fell for the 21st consecutive month and business confidence was still buoyant. March saw mixed returns from fixed interest markets with subordinated financials leading the way.

雖然並非所有股票市場於季內上揚，但已從3月中日本東北發生破壞性地震、海嘯和福島核電廠洩漏輻射事件後的低位反彈。然而，亞洲市場(日本除外)強勁的企業盈利和經濟增長推高指數。韓國公布2010年全年國內生產總值，創8年新高。德國失業率連續21個月下降，企業信心良好。3月份全球定息市場好淡爭持，後債金融債券表現最為優秀。

Market Commentary 市場評論

Equity markets recovered from their mid-March lows following the devastating Tohoku earthquake, tsunami and radiation leakage at the Fukushima nuclear power plant, although not all ended the quarter in positive territory. However, robust corporate earnings and economic growth in the Asian markets (ex Japan) buoyed indices higher with Korea reporting its strongest full year 2010 GDP for eight years. The German unemployment fell for the 21st consecutive month and business confidence was still buoyant. March saw mixed returns from fixed interest markets with subordinated financials leading the way.

雖然並非所有股票市場於季內上揚，但已從3月中日本東北發生破壞性地震、海嘯和福島核電廠洩漏輻射事件後的低位反彈。然而，亞洲市場(日本除外)強勁的企業盈利和經濟增長推高指數。韓國公布2010年全年國內生產總值，創8年新高。德國失業率連續21個月下降，企業信心良好。3月份全球定息市場好淡爭持，後債金融債券表現最為優秀。

Market Commentary 市場評論

The market experienced a volatile session in the aftermath of Japan's tragic natural disasters with rising risk aversion leading to sell-off in the equities market and sending the U.S. Treasury yield lower in the middle of the month. As we approached the quarter end, U.S. Treasuries pared previous gains with yield climbing higher with the concern of the end of the Quantitative Easing 2 leading to upward pressure on U.S. Treasury yield.

在日本發生大地震後，市場一度波動。投資者的避險意欲上漲，令各地股市掀起拋售潮，並觸發美國國庫券孳息在月中下跌。接近季末，美國國庫券孳息上升，令一度上升的價格回落，因為市場關注第二輪量化寬鬆措施將結束，對國庫券孳息造成上升壓力。

Market Commentary 市場評論

Yields continued on a slightly upward path in 1Q, given the correlation with the U.S. Treasury. U.S. growth has surprised on the upside and inflation data has come out higher from the price rise in food and energy. The HKD bond market also widened to some extent vs. U.S. Treasury as the USD / HKD rate rose to near 7.8 from the reallocation of equity flows out of Hong Kong.

鑒於港元債券與美國國庫券的關聯性，港元債券孳息率在第一季繼續輕微上升。美國經濟增長令人驚喜，食品及能源價格上漲則令通脹數據趨高。隨著股市資金流出香港，匯率升至1美元兌7.8港元，港元債券相對美國國庫券息差亦有所擴闊。

Market Commentary 市場評論

March saw mixed returns from fixed interest markets with subordinated financials leading the way. Over the quarter, the 3 months and 12 months interbank rate fell by 2 and 5 basis points respectively. The latest announced Hong Kong's unemployment rate fell to a fresh two-year low of 3.6% as rebounding growth in Asia and China aided local trade and economy. February inflation accelerated. The consumer price index gained 3.7% from a year earlier as food prices and rental costs keep rising.

3月份全球定息市場好淡爭持，後償金融債券表現最為優秀。於季內，3個月和12個月銀行同業拆息下跌2個和5個基點。亞洲和中國的增長惠及本地的貿易和經濟，香港最新公布的失業率下降至兩年新低的3.6%。2月份通脹加劇，隨著食品價格及租金成本不斷上升，消費物價指數上升3.7%。

<p>Low 低</p> 	<p>The fund has a low expected long-term return among BCT funds; its volatility is expected to be low. 該基金的預期長期回報在銀聯信託基金中屬低幅度，預期波幅屬低。</p>

The Risk & Return Profile for each fund is assigned by BCT according to the corresponding fund's volatility and expected return.
每個基金的「風險及回報程度」均由銀聯信託根據個別基金的波幅及預期回報而設定。

Remarks 備註：

- ¹ It is not necessary to show the FER as the period between the reporting date of the fund fact sheet and the inception date for the fund is less than 2 years.
- ² Funds with performance history of less than 3 years since inception to the reporting of the fund fact sheet is not required to show the annualised standard deviation.
- ³ Fund performance is calculated on the basis of NAV-to-NAV in HK\$ with dividend reinvested and is net of the management fees and operating expenses. The 3-year and 5-year performance figures are not available for funds with history of less than 3 years and 5 years, as the case may be, since inception to the reporting of the fund fact sheet. (Source: BCT)
- ⁴ Cash & Others refers to cash at call and other operating items such as account receivables and account payables.
- ⁵ Since launch to end of calendar year return.
- ⁶ It is calculated by comparing the total contributed amount over the specified period with the final NAV. The technique is to use a constant amount to purchase fund units at the prevailing fund price (NAV per unit) on the last trading day of every month over the specified period. The total contributed amount refers to the sum of the monthly contributions made during the specified period, while the final NAV is determined by multiplying the total units cumulated in the same period with the fund price (NAV per unit) on the last trading day of such period. The figures are provided for illustration only. (Source: BCT)
- ⁷ Lipper ratings are based on a fund's performance over a three-year period, and they are subject to change every month. The ratings are from 5 (Leader) to 1; the top 20% of performers are named Lipper Leaders, the next 20% get a rating of 4, and so on. The ratings do not mean funds are guaranteed or that NAV will not fluctuate.
- ⁸ The fund won "Best MPF Fund Over 3 Years – Bond Global" and "Best MPF Fund Over 5 Years – Bond Global" in Lipper Fund Awards Hong Kong 2011. The awards are based on the three-year and five-year performance history (as of 31 December 2010) of the respective fund.

MPF 小知識

BCT Comics Zone

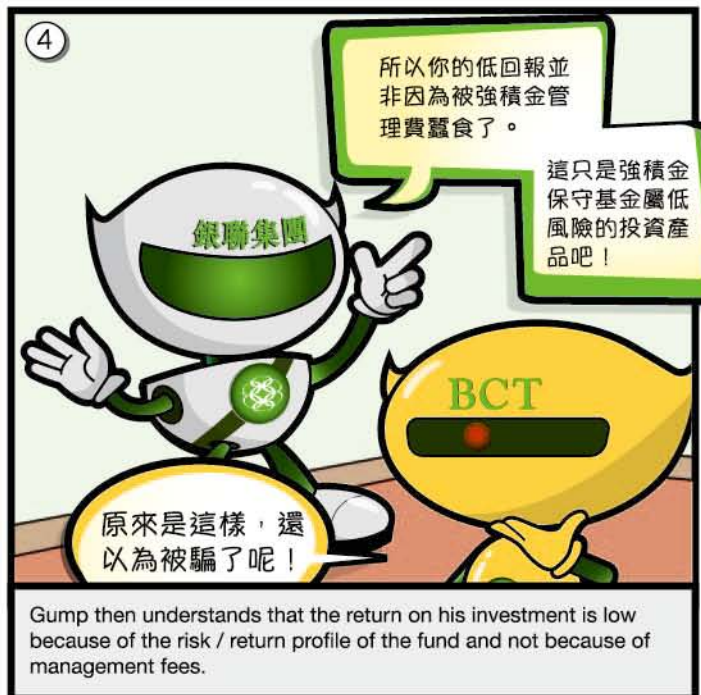

Seeing the low rate of return of his MPF Conservative Fund, Gump blames his MPF company for charging high management fees.

Jack explains to Gump that the near-zero interest rates in recent years do not favour conservative funds, which invest only in short-term HKD bank deposits and short-term high-quality bonds.

For MPF Conservative Funds, no management fees can be charged by trustees if the fund's return is lower than the MPFA's prescribed savings rate for the same month.

Gump then understands that the return on his investment is low because of the risk / return profile of the fund and not because of management fees.
